SELF-INSPECTION CHECKLIST: REGULATED WASTE MANAGEMENT

Hazardous Waste	YES	NO	NA
1. Are hazardous wastes labeled with an appropriate sticker or tag?			
2. Do hazardous waste labels contain legible, full chemical names (i.e., no abbreviations)?			
3. Do hazardous wastes with more than one chemical list the percentage of each chemical in the container and add up to 100%?			
4. Are hazardous wastes listed on the label compatible?			
5. Are hazardous waste containers segregated by compatibility?			
6. Are hazardous waste containers compatible with their contents, in good condition and kept closed?			
7. Are hazardous waste containers stored at or near a Satellite Accumulation Area sign?			
8. Are continuously generated hazardous waste containers (e.g., HPLC) stored in secondary containment bins?			
Biomedical Waste	**YES**	**NO**	**NA**
1. Are biomedical waste box/bag units properly constructed and filled with labeled sharps containers and sealed bags?			
2. Do sharps containers have secure lids, contain only approved sharps waste, and remain below the fill line?
